

NITHISH JUDE J

FULL STACK DEVELOPER

☎ 8248286041 | ✉ nithishjudej@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-stack developer experienced in building production-grade web applications with React, Node.js, and JavaScript, with additional depth in AI-integrated tools and decentralized systems built through competitive hackathons. Comfortable owning a feature end-to-end and shipping working products under tight deadlines. Known for fast execution and turning ambiguous ideas into working software.

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, CSS

Frameworks & Libraries: React.js, Node.js, LangChain.js

Databases & Backend: SQL, REST APIs, AWS

Tools & Platforms: Git, GitHub, AWS, Vercel

Concepts: REST API design, Object-Oriented Programming

EXPERIENCE

Full Stack Developer Intern — Infosys SpringBoard *Mar 2026 – Apr 2026*

React.js · JavaScript · REST APIs

- Developed responsive and user-friendly interfaces for petition creation, polling, and governance dashboards using modern frontend technologies.
- Implemented authentication screens, dashboard views, and geo-filtered petition listing interfaces to improve user experience and accessibility.
- Built dynamic public polling and voting interfaces with live sentiment visualization and interactive UI components.

Full Stack Developer Intern — P2B Cloud *Apr 2026 – Jun 2026*

Kubernetes · React.js

- Built a Kubernetes Dashboard for centralized cluster monitoring and real-time visualization of pods, nodes, and deployments.
- Added RBAC-based access control, namespace isolation, and troubleshooting tools for logs and events.
- Integrated Prometheus and Grafana for custom metrics, alerting, and performance monitoring.

PROJECTS

Real-Time Blood Donation Alert System *Node.js · Twilio API · Geolocation*

- Developed a web-based emergency blood donation platform with real-time stock monitoring and location-based donor alerts within a 10 km radius.
- Implemented automated SMS notifications via Twilio APIs and a donor reward system with redeemable health insurance credit points.

Provenance Pay — Real-Time USDC Royalty Disbursement *Node.js · Solidity*

- Built a real-time USDC royalty disbursement system on Arc Testnet using Circle infrastructure for the Lepton hackathon.
- Integrated MusicBrainz metadata for rights attribution and deployed a Solidity smart contract to automate on-chain royalty splits.

The Super App *React · Node.js · API Integration*

- Developed a personalized React dashboard with user registration, category selection, weather, news, notes, and countdown timers.
- Added movie recommendations with persistent local storage and a responsive UI.

EDUCATION

Loyola-ICAM College of Engineering and Technology, Chennai, India

B.E. Computer Science and Engineering (2023 – 2027) | CGPA: 8.0 / 10

CERTIFICATIONS

- Java Fundamentals & Java Foundations — Oracle Academy
- SQL — NxtWave Academy
- Build Dynamic Web Applications — NxtWave Academy
- CSS & JavaScript — Infosys Springboard
